

## **The advantage of sourcing your packaging from Dordan Manufacturing**

Dordan Mfg. has invested considerable time performing our due diligence to ensure that our supply-chain complies with the various EPR requirements. Such due diligence manifests itself in the following documentation we have received from our material suppliers:

- We have certification that PETG meets the RoHS EU directive 2002/95/EC, WEEE EU directive 2002/96/EC, Reach, California Prop 65, and does not contain latex, heavy metals, or phthalates;
- We have certification that PET complies with the RoHS EU Directive, the Consumer product Safety Improvement Act of 2008 heavy metals and phthalates, the Toxic Packaging Clearing House legislation, and the requirements of the European Packaging Directive EU and the California Toxics in Packaging Prevention Act;
- We have certification that our material does not contain Ozone depleting substances;
- We have certification that no VOC's are used in the manufacture of our Polyester film;
- We have certification that our material is produced free of animal derivatives;
- We have certification that the RPET we have formed has a minimum of 70% post-consumer regrind PET.
- We have certification that the RPET we will form has 100% post-consumer regrind PET.

Because of our understanding of EPR and its various requirements, we can help brand-owners/product producers comply with the dictates of the ever-changing domestic and international markets. We have ensured that our supply chain complies; have you?
